

Aptimize / FTSE 350 Homepage load times

Methodology

To obtain these results, we used WebPageTest.org – a free online tool that accurately measures load times by using Internet Explorer 7 on a dedicated machine from locations around the world to load the webpage and measure load times to “document complete” – where all the page elements are loaded, but before any flash animations begin. We performed over 1,000 tests, measuring load times from Dulles VA USA; Wellington, New Zealand and Gloucester UK.

The domestic measurements are obtained from the Gloucester UK test location, the global load times are an average of the test results from the three locations.

FTSE 350 Homepage Load Times / April 2010
